

**Altech Chemicals**  
Limited

## ASX ANNOUNCEMENT AND MEDIA RELEASE

12 April 2015

# ALTECH SHARE PURCHASE PLAN CLOSED STRONGLY SUPPORTED

### Highlights

- \$0.744 million raised via Share Purchase Plan
- 8.6 million new shares issued at 8.6 cents per share
- Discussions with various potential investors ongoing

Altech Chemicals Limited (Altech/the Company) (ASX: ATC) advises that its Share Purchase Plan (SPP) has now closed.

The Company is delighted with the support for the SPP. A total of \$744,000 was raised from the 250 shareholders that participated.

Total funds raised by the Company from the SPP and the recently announced share placement totals ~\$2.0 million. The funds will be applied to finalising the detailed design of Altech's proposed high purity alumina (HPA) plant in Malaysia, finalising debt funding for the project, and for general working capital purposes.

Altech managing director, Mr Iggy Tan said, *"the Company is most appreciative of the strong support shown by our shareholders for the SPP, which follows on from the support of predominantly new shareholders for the recently completed share placement."*

*The Company is in ongoing discussions with various other potential investors that were unable to meet the timeline to participate in the recent share placement, but remain interested to make an investment in Altech", Iggy concluded.*

### About Altech Chemicals (ASX: ATC)

**Altech Chemicals Limited** (Altech/the Company) is aiming to become one of the world's leading suppliers of **99.99% (4N) high purity alumina (HPA)** ( $Al_2O_3$ ).

HPA is a high-value, high margin and highly demanded product as it is the critical ingredient required for the production of artificial sapphire. Artificial sapphire is used in the manufacture of substrates for LED lights, semiconductor wafers used in the electronics industry, and scratch-resistant artificial sapphire glass used for wristwatch faces, optical windows and smartphone components. There is no substitute for HPA in the manufacture of artificial sapphire.

Global HPA demand is approximately 19,040tpa (2014) and demand is growing at an annual rate of 28%, primarily driven by the growth in worldwide adoption of LEDs. As an energy efficient, longer lasting and lower operating cost form of lighting, LED lighting is replacing the traditional incandescent bulbs. HPA demand is expected to at least double over the coming decade.

Current HPA producers use an expensive and highly processed feedstock material such as aluminium metal to produce HPA. Altech has completed a Bankable Feasibility Study (BFS) for the construction and operation of a 4,000tpa HPA plant at Tanjung Langsat, Malaysia. The plant will produce HPA directly from kaolin clay, which will be sourced from the Company's 100%-owned kaolin deposit at Meckering, Western Australia. Altech's production process will employ conventional "off-the-shelf" plant and equipment to extract HPA using a hydrochloric (HCl) acid-based process. Production costs are anticipated to be considerably lower than established HPA producers.

The Company is currently in the process of securing project financing with the aim of commencing project development in Q1-2017.

### Forward-looking Statements

This announcement contains forward-looking statements which are identified by words such as 'anticipates', 'forecasts', 'may', 'will', 'could', 'believes', 'estimates', 'targets', 'expects', 'plan' or 'intends' and other similar words that involve risks and uncertainties. Indications of, and guidelines or outlook on, future earnings, distributions or financial position or performance and targets, estimates and assumptions in respect of production, prices, operating costs, results, capital expenditures, reserves and resources are also forward looking statements. These statements are based on an assessment of present economic and operating conditions, and on a number of assumptions and estimates regarding future events and actions that, while considered reasonable as at the date of this announcement and are expected to take place, are inherently subject to significant technical, business, economic, competitive, political and social uncertainties and contingencies. Such forward-looking statements are not guarantees of future performance and involve known and unknown risks, uncertainties, assumptions and other important factors, many of which are beyond the control of our Company, the Directors and management. We cannot and do not give any assurance that the results, performance or achievements expressed or implied by the forward-looking statements contained in this announcement will actually occur and readers are cautioned not to place undue reliance on these forward-looking statements. These forward looking statements are subject to various risk factors that could cause actual events or results to differ materially from the events or results estimated, expressed or anticipated in these statements.
